

'The 16 to 19 Tuition Fund for 2021 to 2022 Academic Year'

The funding is being used to support small group tuition for students aged 16 to 19 in English, Maths and other subjects that have been disrupted, including vocational and/or academic learning.

Students aged 19 to 24 who have an education, health and care (EHC) plan are also eligible for support.

All students must be on a 16 to 19 study programme and the funding should be used to support the tuition activity above and beyond the programmes of education already planned.

At Space Studio West London we have created an additional program for a small group of students this includes the introduction of a vocational courses in Esports and Science as well as support for English and Maths. We will use the tuition funding to split the re-sit classes into two smaller groups. (2 hours per week)

Two EHCP students have targeted tutor support for Maths and English for Engineering. (4 hours per week)

One high needs SEND student has targeted tutor support for English and Maths (4 hours per week)

These tutoring sessions are run by qualified teachers who have been employed by the school but have tuition sessions as part of their timetable.

Total cost of these sessions = approximately £6350
